

Week 6 Commands

- | | |
|---|---|
| 1) service iptables
start/stop/restart | 4) iptables -F |
| 2) service iptables save | 5) iptables --help |
| 3) iptables -L | https://do.co/3d16Z5A |

Configuration Files

- 1) /etc/sysconfig/iptables (this file saves all the firewall rules by default)
- 2) /var/log/messages (firewall logs are saved here)

Options to Configuring IPTables

- 1) Edit it in the CHAIN using the iptables command. For example:
iptables -A INPUT -s xxx.xxx.xxx.xxx -j DROP
iptables -I INPUT -s 10.1.13.12/32 -p tcp --dport 22 -j REJECT
iptables -A INPUT -i lo -j ACCEPT
- 2) Edit the iptables configuration file:
vi /etc/sysconfig/iptables
* always backup configuration files prior to editing
- 3) Use system-config-firewall
system-config-firewall
